VAT	Value Added Tax

Annual Financial Statements for the year ended 30 June, 2016

Accounting Officer's Responsibilities and Approval

The Accounting Officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the Annual Financial Statements and related financial information included in this report. It is the responsibility of the Accounting Officer to ensure that the Annual Financial Statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the Annual Financial Statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The Annual Financial Statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The Accounting Officer acknowledges that he is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the Accounting Officer to meet these responsibilities, the Accounting Officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The Accounting Officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the Annual Financial Statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year to 30 June, 2017 and, in the light of this review and the current financial position, he is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

The municipality is wholly dependent on the income from services, rates and grants for continued funding of operations. The Annual Financial Statements are prepared on the basis that the municipality is a going concern and that the council has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

The Auditor General (SA) is responsible for independently reviewing and reporting on the municipality's Annual Financial Statements. The Annual Financial Statements have been examined by the municipality's external auditors.

The Annual Financial Statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

liabilities, contingent obligations and commit	tments will occur in the ordinary course of business.
The Annual Financial Statements set out on approved by the Council on 31 August 2016	page 5 to 48, which have been prepared on the going concern basis, were and were signed on its behalf by
Accounting Officer M Moyo

Annual Financial Statements for the year ended 30 June, 2016

Approval of Annual Financial Statements

I am responsible for the preparation of these Annual Financial Statements, which are set out on pages 5 to 48, in terms of Section 126(1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality.

I certify that the salaries, allowances and benefits of Councillors made to Councillors, if any, and payments made to Councillors for loss of office, if any, as disclosed in note 31 of these Annual Financial Statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

The Accounting Officer is responsible for the presentation and fair presentation of these Annual Financial Statements in accordance with Generally Recognised Accounting Practice (GRAP) in a manner required by local government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

It is the responsibility of the Accounting Officer to ensure that the Annual Financial Statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended.

Annual Financial Statements for the year ended 30 June, 2016

Accounting Policies

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise. They are presented in South African Rand.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these annual financial statements, are disclosed below.

1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.2 Segment information

A segment is an activity of an entity:

- that generates economic benefits or service potential (including economic benefits or service potential relating to transactions between activities of the same entity);
- whose results are regularly reviewed by management to make decisions about resources to be allocated to that activity and in assessing its performance; and
- for which separate financial information is available.

Reportable segments are the actual segments which are reported in the segment report. They are the segments identified above or alternatively an aggregation of two or more of those segments where the aggregation criteria are met.

1.3 Significant judgements and sources of estimation uncertainty

The preparation of Annual Financial Statements, in conformity with Standards of GRAP requires the use of certain critical accounting estimates. It also requires management to exercise judgement in the process of applying the Municipality's accounting policies. The areas involving a higher degree of judgement or complexity or areas where assumptions and estimates that are significant to the Annual Financial Statements are disclosed in the relevant sections of the Annual Financial Statements. Although these estimates are based on management's knowledge of current events and actions. Actual results in the future could differ from these estimates which may be material to the Annual Financial Statements. Significant judgements include:

Trade receivables and loans and receivables

The municipality assesses its trade receivables and loans and receivables for impairment at the end of each reporting date. In determining whether an impairment loss should be recorded in surplus or deficit, the municipality makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

The impairment for trade receivables and loans and receivables is calculated on a portfolio basis, at weighted average percentage based on historical loss ratios, adjusted for national and industry-specific economic conditions and other indicators present at the reporting date that correlate with defaults on the portfolio. These annual loss ratios are applied to loan balances in the portfolio and scaled to the estimated loss emergence period.

Consumer debtors are expected to be realised within 12 months after the reporting date.

Fair value estimation

The carrying value less impairment provision of trade receivables and payables approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the municipality for similar financial instruments.

Provisions

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in the detailed disclosure note 19 - Provisions.

Annual Financial Statements for the year ended 30 June, 2016

Allowance for doubtful debts

An impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, computed at initial recognition.

1.4 Investment property

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- · use in the production or supply of goods or services; or
- · administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at fair value. Based on management's judgement, the following criteria have been used to distinguish investment properties from owner occupied property or property held for resale:-

Land held for long-term capital appreciation rather than for short-term sale in the ordinary course of operations;

A building owned by the municipality (or held by the municipality under a finance lease) and leased out under one or more operating leases on a commercial basis (this will include the property portfolio rented out on a commercial basis on behalf of the municipality);

A property owned by the municipality and leased out at a below market rental; and

Property that is being constructed or developed for future use as investment property.

Subsequent Measurement

Investment property is measured using fair value model and shall measure all of its property at fair value.

The fair value of investment property is the price at which the property could be exchanged between knowledgeable, willing parties in an arm's length transaction. Fair value specifically excludes an estimated price inflated or deflated by special terms or circumstances such as sale and leaseback arrangement, special considerations or concessions granted by anyone associated with the sale.

An entity determines fair value without any deduction for transaction costs it may incur on sale or other disposal.

Derecognition

An Investment Property shall be derecognised (eliminated from the Statement of Financial Position) on disposal or when the Investment Property is permanently withdrawn from use and no future economic benefits or service potential are expected from its Disposal.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

1.5 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the municipality; and
- the cost of the item can be measured reliably.

Annual Financial Statements for the year ended 30 June, 2016

Accounting Policies

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Property, plant and equipment is carried at revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

Subsequent measurement

Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

The initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located is also included in the cost of property, plant and equipment, where the entity is obligated to incur such expenditure, and where the obligation arises as a result of acquiring the asset or using it for purposes other than the production of inventories.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses except for Land which is carried at revalued amount being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

Property, plant and equipment is carried at revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses.

Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

Annual Financial Statements for the year ended 30 June, 2016

Accounting Policies

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is restated proportionately with the change in the gross carrying amount of the asset so that the carrying amount of the asset after revaluation equals its revalued amount.

When an item of property, plant and equipment is revalued, any accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset and the net amount restated to the revalued amount of the asset.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings when the asset is derecognised.

The revaluation surplus in equity related to a specific item of property, plant and equipment is transferred directly to retained earnings as the asset is used. The amount transferred is equal to the difference between depreciation based on the revalued carrying amount and depreciation based on the original cost of the asset.

Depreciation

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Depreciation only commences when the asset is available for use, unless stated otherwise. The depreciation rates are based on the following estimated useful lives:

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

Property, plant and equipment is carried at revalued amount, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are made with sufficient regularity such that the carrying amount does not differ materially from that which would be determined using fair value at the end of the reporting period.

Any increase in an asset's carrying amount, as a result of a revaluation, is credited directly to a revaluation surplus. The increase is recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

Any decrease in an asset's carrying amount, as a result of a revaluation, is recognised in surplus or deficit in the current period. The decrease is debited in revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

The useful lives of items of property, plant and equipment have been assessed as follows:

Asset classification	Depreciation method	Average useful life
Buildings	Straight line	5 - 25 years
Infrastructure	Straight line	3 - 60 years
Leased assets	Straight line	3 - 5 years
Other property, plant and equipment	Straight line	3 - 10 vears

Derecognition

Annual Financial Statements for the year ended 30 June, 2016

Accounting Policies

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Assets which the municipality holds for rentals to others and subsequently routinely sell as part of the ordinary course of activities, are transferred to inventories when the rentals end and the assets are available-for-sale. Proceeds from sales of these assets are recognised as revenue. All cash flows on these assets are included in cash flows from operating activities in the cash flow statement.

1.6 Site restoration and dismantling cost

The municipality has an obligation to dismantle, remove and restore items of property, plant and equipment. Such obligations are referred to as 'decommissioning, restoration and similar liabilities'. The cost of an item of property, plant and equipment includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located, the obligation for which the municipality incurs either when the item is acquired or as a consequence of having used the item during a particular period for purposes other than to produce inventories during that period.

If the related asset is measured using the cost model:

- (a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in surplus or deficit; and
- (c) if the adjustment results in an addition to the cost of an asset, the municipality considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If it is such an indication, the asset is tested for impairment by estimating its recoverable amount or recoverable service amount, and any impairment loss is recognised in accordance with the accounting policy on impairment of cash-generating assets and/or impairment of non-cash-generating assets.

The municipality has a landfill site which it is obligated to rehabilitate at the end of its useful life.

Annual Financial Statements for the year ended 30 June, 2016

Accounting Policies

1.7 Intangible assets

Initial Recognition

Identifiable non-monetary assets without physical substance are classified and recognised as Intangible Assets. The municipality recognises an Intangible Asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality and the cost or fair value of the asset can be measured reliably.

Internally generated Intangible Assets are subject to strict recognition criteria before they are capitalised. Research expenditure is recognised as an expense as it is incurred. Costs incurred on development projects (relating to the design and testing of new or improved products) are recognised as Intangible Assets when the following criteria are fulfilled:-

- it is technically feasible to complete the Intangible asset so that it will be available for use or sale.
- Management intends to complete the Intangible Asset and use or sell it.
- there is an ability to use or sell it.
- it can be demonstrated how the Intangible Asset will generate probable future economic benefits or service potential.
- Adequate technical, financial and other resources to complete the development and to use or sell the Intangible asset are available; and
- the expenditure attributable to the Intangible asset during its development can be measured reliably.

Other development expenditures that do not meet these criteria are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an asset in a subsequent period. Capitalised development costs are recorded as Intangible Assets and amortised from the point at which the asset is available for use. Development assets are tested for impairment annually, in accordance with GRAP 21 or GRAP 26.

Intangible Assets are initially recognised at cost. The cost of an Intangible Asset is the purchase price and other costs attributable to bring the Intangible Asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality, or where an Intangible Asset is acquired at no cost, or for a nominal cost, the cost shall be its fair value as at the date of acquisition. Trade discounts and rebates are deducted in arriving at the cost...

The cost of an Intangible Asset acquired in exchange for non-monetary assets or monetary assets, or a combination of monetary and non-monetary assets, is measured at the fair value of the asset given up, unless the fair value of the asset received is more clearly evident. If the acquired item could not be measured at its fair value, its cost is measured at the carrying amount of the asset given up.

If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

Subsequent Measurement, Amortisation and Impairment.

After initial recognition, Intangible Assets are carried at cost less any accumulated amortisation and any accumulated impairment losses.

Expenditure on an intangible item that was initially recognised as an expense shall not be recognised as part of the cost of an Intangible Asset at a later date.

In terms of GRAP 31, Intangible Assets are distinguished between internally generated Intangible Assets and other Intangible Assets. It is further distinguished between indefinite or finite useful lives. Amortisation is charged on a *Straight-line Basis* over the Intangible Assets' useful lives. The residual value of Intangible Assets with finite useful lives is zero, unless an active market exists. Where Intangible Assets are deemed to have indefinite useful lives, such Intangible Assets are not amortised. However, such Intangible Assets are subject to an annual impairment test.

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item
Computer software

Useful life 2 years

Intangible Assets are annually tested for impairment as described in Accounting Policy 7 on Impairment of Assets, including Intangible Assets not yet available for use. Where items of Intangible Assets have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the period that the impairment is identified. The impairment loss is the difference between the carrying amount and the recoverable service amount.

Annual Financial Statements for the year ended 30 June, 2016

Accounting Policies

The estimated useful life, residual values and amortisation method are reviewed annually at the end of the financial year. Any adjustments arising from the annual review are applied prospectively as a Change in Accounting Estimate in the Statement of Financial Performance.

Derecognition

Intangible Assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an Intangible Asset is determined as the difference between the proceeds of disposal and the carrying value and is recognised in the Statement of Financial Performance

Annual Financial Statements for the year ended 30 June, 2016

Accounting Policies

Transitional provision

The municipality changed its accounting policy for intangible assets in 2016. The change in accounting policy was made in accordance with its transitional provision as per Directive 4 of the GRAP Reporting Framework.

In accordance with the transitional provision as per Directive 2 of the GRAP Reporting Framework, where intangible assets were acquired through a transfer of functions, the municipality is not required to measure that intangible assets for a period of three years from the effective date of the transfer of functions or the effective date of the Standard, whichever is later. The municipality acquired a transfer(s) of function in 2016 and intangible assets has accordingly been recognised at provisional amounts, as disclosed in 11.

Until such time as the measurement period expires and intangible assets are recognised and measured in accordance with the requirements of the Standard of GRAP on Intangible assets, the municipality need not comply with the Standards of GRAP on:

- Presentation of Financial Statements (GRAP 1),
- The Effects of Changes in Foreign Exchange Transactions (GRAP 4),
- Leases (GRAP 13),
- Segment Reporting (GRAP 18),
- Discontinued Operations (GRAP 100)

The exemption from applying the measurement requirements of the Standard of GRAP on Intangible assets implies that any associated presentation and disclosure requirements need not be complied with for intangible assets not measured in accordance with the requirements of the Standard of GRAP on Intangible assets.

1.8 Heritage assets

A Heritage asset is defined as an asset that has a cultural, environmental, historical, natural, scientific, technological or artistic significance, and is held and preserved indefinitely for the benefit of present and future generations.

Heritage assets are considered to be indefinite assets and are therefore not depreciated.

Initial Recognition

The cost of an item of Heritage Assets is recognised as an asset if, and only if, it is probable that future economic benefits or service potential associated with the item will flow to the municipality, and if the cost or fair value of the item can be measured reliably

Heritage Assets are initially recognised at cost on its acquisition date or in the case of assets acquired by grant or donation, deemed cost, being the fair value of the asset on initial recognition. The cost of an item of Heritage Assets is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

The cost of an item of Heritage Assets acquired in exchange for a non-monetary asset or monetary asset, or a combination of monetary and non-monetary assets, is measured at the fair value of the asset given up, unless the fair value of the asset received is more clearly evident. If the acquired item could not be measured at its fair value, its cost is measured at the carrying amount of the asset given up.

Subsequent Measurement

Subsequent expenditure relating to Heritage Assets is capitalised if it is probable that future economic benefits or potential service delivery associated with the subsequent expenditure will flow to the municipality and the cost or fair value of the subsequent expenditure can be reliably measured. Subsequent expenditure incurred on an asset is only capitalised when it increases the capacity or future economic benefits associated with the asset. Where the municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component.

Subsequently all Heritage Assets are measured at cost, less accumulated impairment losses Of fair value if the initial cost cannot be measured reliably.

Derecognition

Annual Financial Statements for the year ended 30 June, 2016

Accounting Policies

The carrying amount of an item of Heritage Assets is derecognised on disposal, or when no future economic benefits or service potential are expected from its use or disposal. The gain or loss arising from derecognition of an item of Heritage Assets is included in surplus or deficit when the item is derecognised. Gains are not classified as revenue. Gains or losses are calculated as the difference between the carrying value of assets (cost less accumulated impairment losses) and the disposal proceeds is included in the Statement of Financial Performance as a gain or loss on disposal of Heritage Assets.

1.9 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the municipality assesses the classification of each element separately.

Finance leases - lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant and equipment.

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

Any contingent rents are expensed in the period in which they are incurred.

1.10 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

Subsequently inventories are measured at the lower of cost and net realisable value.

Inventories are measured at the lower of cost and current replacement cost where they are held for;

- distribution at no charge or for a nominal charge; or
- consumption in the production process of goods to be distributed at no charge or for a nominal charge.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

Current replacement cost is the cost the municipality incurs to acquire the asset on the reporting date.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories of items that are not ordinarily interchangeable and goods or services produced and segregated for specific projects is assigned using specific identification of the individual costs.

The cost of inventories is assigned using the first-in, first-out (FIFO) formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

Annual Financial Statements for the year ended 30 June, 2016

Accounting Policies

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

1.11 Employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party (as defined in the Standard of GRAP on Related Party Disclosures) of the reporting entity, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting entity's own creditors (even in liquidation) and cannot be paid to the reporting entity, unless either:

- the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit
 obligations; or
- the proceeds are returned to the reporting entity to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

- an entity's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide post-employment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from an entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Post-employment benefits: Defined contribution plans

Defined contribution plans are post-employment benefit plans under which an entity pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

When an employee has rendered service to the entity during a reporting period, the entity recognise the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, an entity recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Where contributions to a defined contribution plan do not fall due wholly within twelve months after the end of the reporting period in which the employees render the related service, they are discounted. The rate used to discount reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the obligation.

1.12 Provisions and contingencies

Provisions are recognised when:

- the municipality has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

Annual Financial Statements for the year ended 30 June, 2016

Accounting Policies

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the financial period end.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the municipality settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

If the municipality has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in the relevant notes to the financial statements.

1.13 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts, volume rebates and value-added taxes (VAT).

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Interest

Interest is recognised, in surplus or deficit, using the effective interest rate method.

1.14 Revenue from non-exchange transactions

Non-exchange transactions are defined as transactions where the municipality receives value from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

Measurement

Accounting Policies

Revenue is measured at the fair value of the	consideration received or receivable	e, net of trade discounts and volume rebates.

Annual Financial Statements for the year ended 30 June, 2016

Accounting Policies

Rates, including collection charges and penalties interest

Revenue from rates, including collection charges and penalty interest, is recognised when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the amount of the revenue can be measured reliably; and
- there has been compliance with the relevant legal requirements.

Changes to property values during a reporting period are valued by a suitably qualified valuator and adjustments are made to rates revenue, based on a time proportion basis. Adjustments to rates revenue already recognised are processed or additional rates revenue is recognised.

Fines

Revenue from the issuing of fines is recognised when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the amount of the revenue can be measured reliably.

Government grants

Government grants are recognised as revenue when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality,
- the amount of the revenue can be measured reliably, and
- to the extent that there has been compliance with any restrictions associated with the grant.

Other grants and donations

Other grants and donations are recognised as revenue when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the amount of the revenue can be measured reliably; and
- to the extent that there has been compliance with any restrictions associated with the grant.

Donations are measured at the fair value of the consideration received or receivable when the amount of the revenue can be measured reliably.

If goods in-kind are received without conditions attached, revenue is recognised immediately. If conditions are attached, a liability is recognised, which is reduced and revenue recognised as the conditions are satisfied.

1.15 Commitments

Commitments are not recognised. Commitments are disclosed in the notes to the Annual Financial Statement. A commitment is disclosed unless the possibility of an outflow of resources embodying economic benefit is remote.

1.16 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

Annual Financial Statements for the year ended 30 June, 2016

Accounting Policies

1.17 Expenditure

Expenses are decreases in economic benefits or service potential during the reporting period in the form of outflows or consumption of assets or incurrences of iabilities that result in a decrease in net assets.

An expense is recognised in the municipality's Statement of Financial Performance when the following criteria is satisfied: The cost or value may involve estimation. Where an item possesses the essential characteristics of an expense but fails to meet the criteria for recognition, it is disclosed in the note; and:

All expenditure has been dealt with in terms of the above definition and recognition criteria The cost or value may involve estimation.

Expenses are generally accounted for on an accrual basis at fair value. Fair value is the amount for which an asset could be exchanged or a liability settled between knowledgeable and willin parties in an arm's length transaction. Under the accrual basis of accounting, expenses are recognised as incurred when goods are received or services are consumed. This may not be when goods are paid for.

Unauthorised expenditure means:

- · overspending of a vote or a main division within a vote; and
- expenditure not in accordance with the purpose of a vote or, in the case of a main division, not in accordance with the purpose of the main division.

All expenditure relating to unauthorised expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.18 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure means expenditure which was incurred which does not result in future economic benefits flowing to the municipality and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.19 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the statement of financial performance and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

1.20 Housing subsidies

The municipality provides post-retirement housing subsidies for qualifying staff members. The payment of these subsidies is reflected as expenditure in the municipality.

1.21 Gratuities

The municipality provides gratuities for qualifying staff members in terms of the relevant conditions of employment. The expenditure is recognised in the municipality when the gratuity is paid.

1.22 Related parties

The municipality has processes and controls in place to aid in the identification of related parties. A related party is a person or an entity with the ability to control or jointly control the other party or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. Related party relationships where control exists are disclosed regardless of whether any transactions took place between the parties during the reporting period.

Annual Financial Statements for the year ended 30 June, 2016

Accounting Policies

1.23 Going concern

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of service delivery.

1.24 Budget information

Municipalities are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by the municipality shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The annual financial statements and the budget are on the same basis of accounting therefore a reconciliation with the budgeted amounts for the reporting period have been included in the Annual Financial Statements.

Comparative information is not required.

Deviations between budget and actual amounts are regarded as material differences when a 10% deviation exists. All material differences are explained in the relevant Notes to the Annual Financial Statements.

No interest is paid on consumer deposits.

17. Employee benefit obligations

Defined benefit plan

Post retirement medical aid plan

The Council operates a defined medical aid benefit scheme for the benefit of its qualifying employees.

Post-retirement medical aid benefits are offered to qualifying employees by subsidising a portion of the medical aid contribution after retirement.

The municipality is committed to pay subsidies broadly as follows:

- 60% to current employees
- 60%/100% to current continuation retirees
- Widow(er)s and orphans of current employees are entitled to continue at 60% or 100%, the subsidy upon the death of the pensioner.

Long service bonus awards

The long service bonus awards consist of an obligation to pay out bonus in the year of the employee attaining the required service. This obligation represents a liability to the municipality and the value is represented by the present value of the total long service bonus awards expected to become payable under the municipality's current policy.

The municipality offers bonuses for every five years of completed service from ten years to forty five years. Long service accumulated leave must be taken within one year of receiving such leave or may be wholly or partially cashed. It has been assumed that in all cases, employees choose to exercise the option to wholly convert their accumulated leave days bonus into cash.

The most recent actuarial valuation was performed for the above mentioned obligations on 30 June 2016 by One Pangaea Financial using Projected Unit Credit Method.

The full obligation has been recognised as at the date of the statement of financial position.

The aggregate amounts recognised in the statement of financial position are as follows:

Carrying value Opening balance Current service cost Interest cost Benefit payment Acturial gain /(losses)	11,223,000 (724,000) (1,020,000) 439,000 488,000	(10,728,000) (734,000) (999,000) 448,000 790,000
	10,406,000	(11,223,000)
Non Current Liabilities Current Liabilities	(10,048,000) (358,000)	(10,775,000) (448,000)
	(10,406,000)	(11,223,000)

Net expense recognised in the statement of financial performance

Notes to the Annual Financial Statements

	2016 R	2015 R
17. Employee benefit obligations (continued)		
17.1. Post retirement medical aid		
Opening balance Current service cost	(9,962,000)	(9,562,000)
Interest cost	(570,000)	(556,000)
Benefit payment	(917,000)	(904,000)
Acturial gain / (Losses)	344,000 2,166,000	345,000
Totalia gali / (Losses)		715,000
	(8,939,000)	(9,962,000)
17.2. Long service bonus awards		
Opening balance	(1,261,000)	(1,166,000)
Current Service cost	(154,000)	(178,000)
interest cost	(103,000)	(95,000)
Benefit payment	95,000	103,000
Acturial gain /(Losses)	(44,000)	75,000
	(1,467,000)	(1,261,000)
Assumptions used at the reporting date:		
Discount rate used		.37%
Health care cost inflation		.89%
Consumer price index	8.56% 8.	39%
Retirement age		
Female	63	63
Male	63	63
Number of eligible members	67	70
Number of pensioners	9	9

Other assumptions - post retirement medical aid

Assumed healthcare cost trends rates have a significant effect on the amounts recognised in surplus or deficit. A one percentage point change in assumed healthcare cost trends rates would have the following effects:

Annual Financial Statements for the year ended 30 June, 2016

Notes to the Annual Financial Statements

2016	2015
R	R

17. Employee benefit obligations (continued)

	One percentage point increase	One percentage point
Effect on the aggregate of the service cost and the interest cost Effect on defined benefit obligation	2,010,000	-,
Enect on defined benefit obligation	12,337,000 14,347,000	

Other assumptions - long service bonus awards

The valuation bases assumed that the salary inflation rate (which manifest its self as an annual increase in employees' salaries which determine the bonuses payable) will be 0,09% less than the corresponding discount rate, in the long term. The effect of 1% increase and decrease in the salary inflation rate is as follows:

	One percentage point increase	One percentage point
Effect on the aggregate of the service cost and the interest cost Effect on the employees benefit obligation	353,000 1,617,000	,
	1,970,000	1,621,000

Defined contribution plan

Certain municipal councillors and employees belong to The Natal Joint Municipal Pension Fund (Superannuation) and The Natal Joint Municipal Pension Fund (Retirement) which are administered by the Province.

These schemes cannot be broken down per municipality, as they are considered to be multi-employer schemes and hence are treated as defined contribution schemes by the municipality. Information from the schemes as a whole is included below.

Municipal employees are also members of the KwaZulu Natal Joint Municipal Provident Fund, South African Local Authorities (SALA) Provident and Retirement Funds. All contributions have been included in the employee related cost note.

17. Employee benefit obligations (continued)

SUPERANNUATION FUND

As at 31 March 2012 (the last date of valuation), the actuarial value of total assets was R 121,7 million more than the actuarial value of liabilities for service of members to that date and for pensioners, made up as follows:

- Surplus of R 210 million in respect of pensioners (funding level 119,4%)
- Deficit of R 88,3 million in respect of members (funding level 95%)
- The fund was thus 104% funded
- The fund did not hold an investment reserve
- The total contribution rate payable, including the surcharge by and on behalf of members, exceeded that required for future service by 1,41 % of members pensionable emoluments
- An additional contribution by way of a surcharge amounting to 6% of salaries is currently in place to fund the deficit. The surcharge have been reduce to 4,5% with effect from 1 July 2007

RETIREMENT FUND

As at 31 March 2012 (the last date of valuation), the actuarial value of total assets was R 140,9 million more that the actuarial value of liabilities for services of members to that date and for pensioners made up as follows:

- Surplus of R 63,4 million in respect of pensioners (funding level 116,2%)
- Deficit of R204,3 million in respect of members (funding level 73%)
- The fund was thus 87,7% funded
- The fund did not hold an investment reserve
- The total contribution rate payable (including the surcharge of 14 % payable jointly by pre-1 July 2002 members and their employers on their behalf) exceeded that required for future service by 12,59% of members' pensionable emoluments. This should be sufficient, provided that salary increases do not exceed CPIX plus 0,5 %.

18. Unspent conditional grants and receipts

	Opening Balance	Prior year adjustments	Additions	Total
Provision for landfill site	6,079,204	(542,736)	140,401	5,676,869

Landfill site

The landfill site provision is raised for the rehabilitation of the waste disposal site to its original state once the site has reached the end of its useful life. This is expected to be paid by 30 June 2017.

A discounting factor based on prime interest and adjustment for municipal specific risk was applied.

Leave pay

The leave pay provision is accrued at the Basic Conditions of Employment Act rate and is accumulated to a maximum of 48 days per employee.

20. Annuity loan

Balance at year-end	15,239	67,224
Less: Current portion transferred to current liabilities	(15,239)	(67,224)
Long term portion		+

The municipality received five loans from the Development Bank of Southern Africa (DBSA) to fund water, electricity and sewerage expenditure. The terms of the loans vary between forty to sixty years. Each loan has a fixed interest rate however, all loans have different fixed interest rates. Interest rates are between 14,50% to 16,32% per annum, payable every six months.

Three of the five loans received were recoverable from uMgungundlovu District Municipality as the water and sanitation function was ceded to the District Municipality.

Valuations

Valuations on land and buildings are performed every four years. The last general valuation came into effect on 1 July, 2012.

Rebates of 30% were granted to rates on residential properties, 55% on agricultural properties, 30% on public service infrastructure and 20% on public benefit organisation. In the 2011/2012 year rebates of 30% were granted to rates on residential, 55% agricultural properties.

Rates are levied on a monthly basis.

Rates are levied on the following properties as per the valuation roll:

	56,296,486	44,264,627

Equitable share

In terms of the Section 227 of the Constitution, this grant is used to subsidise the provision of basic services to indigent community members. The Equitable share grant also provides funding for the municipality to deliver free basic services to poor households and to subsidise the cost of administration and other core services for the municipality.

Museum subsidy

This subsidy has been granted to the municipality for operational upkeep of the museum in the area.

Municipal infrastructure grant (MIG)

This grant is used to address backlogs in municipal infrastructure required for the provision of basic services.

Expanded public works programme (EPWP)

This subsidy is provided by the Department of Public Works to assist with the alleviation of poverty in the municipal area by providing temporary employment for the unemployed.

Small town grant

This subsidy is provided by the Department of Cooperative Governance and Traditional Affairs to perform feasibility studies with a view of developing the town by improving its economic state and attracting investment.

This committed expenditure relates to property and will be financed by available bank facilities, retained surpluses, rights issue of shares, issue of debentures, mortgage facilities, existing cash resources, funds internally generated, etc.

41. Contingencies

There are no contingencies against or for the Municipality.

Annual Financial Statements for the year ended 30 June, 2016

Notes to the Annual Financial Statements

2016	2015
R	R

42. Prior period errors

In the prior year, some assets were discovered to be duplicated in the Fixed Asset Register and erroneously removed as disposals. These assets have been subsequently reclassified as adjustments in the current year resulting in a nil effect on accumulated surplus. The following balances/class of transactions were incorrectly accounted for and adjustments were made to correct the differences:

Assets

Landfill provision

Payables

Annuity loans

VAT

Revenue

The correction of the errors result in the adjustments as follows:

Increase in Revaluation Reserve - (6,349,150) Increase in VAT Control - 21,386 Increase in Debtors - 7,783,639 Decrease in Provision - 542,736 Decrease in Annuity loan - 70,202 Increase in Payables - (6,176,877) Increase in Accumulated Surplus - (2,359,807)	Increase in Assets	-	1,748,257

	26,425,633	23,466,847

47. Deviation from supply chain management regulations

In terms of section 36(2) of the Municipal Supply Chain Management Regulation approved by council, any deviation from the Supply Chain Management Policy needs to be approved/ Condoned by the Municipal manager, noted by council where the formal procurement processes could not be followed must be noted in the Annual Financial Statements

The following deviations from the tender stipulations in terms of the municipality's Supply Chain Management policy ratified by the Municipal Manager and reported to council.

Deviations		
Deviations for the current year	970,667	103,253

48. Risk management

Maximum credit risk exposure

Credit risk consists mainly of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis. If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the municipality. The utilisation of credit limits is regularly monitored.

Annual Financial Statements for the year ended 30 June, 2016

Notes to the Annual Financial Statements

2016	2015
R	R

48. Risk management (continued)

Financial assets exposed to credit risk at year end are noted under the respective financial assets - investments, trade and other receivables and the cash and cash equivalents notes.

These balances represent the maximum exposure to credit risk.

Cash and cash equivalents Consumer debtors	4,934,687 19,172,146	12,174,934 12,192,568
Maximum credit exposure	24,106,833	24,367,502

Liquidity risk

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

The table below analyses the municipality financial liabilities into amounts due within the 12 months after:

Trade payables	31,385,490	14,104,965
Finance lease obligation	512,087	410,803
Short term portion of long term liabilities	15,239	67,224
	31,912,816	14,582,992

Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

At year end, financial instruments exposed to interest rate risk were as follows:

Financial Assets - Investments

Financial Lease Obligation

Annuity Loan

- Call deposits
- Notice deposits
- Long-term debtors

This note presents the municipality's exposure to this risk. Quantitative disclosures of the amounts are disclosed throughout the financial statements.

49. Electricity losses

Electricity units (kWh) lost in distribution Electricity units (kWh) purchased from Eskom Electricity units (kWh) sold from Eskom

21,777,157	15,257,531
(42,838,682)	(46,976,912)
64,615,839	62,234,443

Electricity losses for the financial year is 33.70% (2015: 18%). The Rand value of the electricity losses for the current financial year is R7,878,091 (2015: R6,874,000).

These losses are attributable to electricity line losses within the electricity network infrastructure.

Annual Financial Statements for the year ended 30 June, 2016

Notes to the Annual Financial Statements

2016	2015
R	R

50. Going concern

We draw attention to the fact that the Municipality has unspent conditional grants liabilities that are not fully cash backed.

The unspent conditional grants liability amounts to R19,709,044 and the Municipality has cash and cash equivalents to the value of R4,934,687.

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of service delivery.
